

Washington State

Public Works Board

Recommended for 2016 Construction Loan Funding:

City of Quincy

Wastewater Discharge Pipeline & Reuse

County: Grant
Legislative District: 13th
PWB Loan Request: \$7,000,000
Other Funds: \$9,475,000
Total Project Cost: \$16,475,000

Serves:

- **Schools:** 8 (2,716 Students)
- **Businesses:** 201
- **Community Facilities:** 6

The project will construct a new wastewater outfall. The City's 50-year old discharge agreement with the Bureau of Reclamation is expiring and the City will not be able to continue to discharge into its wasteway canal after 2015/16. If a new pipeline is not in place by the contract expiration deadline, local industries may need to cease operation of their facilities. The project includes treatment plant modifications that will free up long term municipal plant capacity, rectify legislative environmental requirements and take advantage of current significant economic development opportunities.

Previously Funded PWTF Projects	Amount	Year	PWTF Program	Status
Central Business District Street Renovation	\$449,995	1997	Construction	Complete
Water System Improvements	\$723,100	1998	Construction	Complete
